

Who is OneShare

OneShare Health is a medical cost sharing program that helps individuals and families address the challenges of escalating healthcare costs and soaring insurance premiums. It is not insurance, but rather an affordable alternative. Membership contributions are often thirty-five to fifty percent less than traditional medical insurance policies and our members enjoy access to one of the largest PPO networks in the nation, PHCS.

How it Works

Members voluntarily help pay each other's medical expenses through OneShare Health's medical sharing programs. Monthly membership contributions provide the sharing power behind our medical sharing programs. OneShare Health receives the medical bills of members and sends them to our TPA (third party administrator) who determines if the medical expense is eligible for sharing based on our member guidelines. All eligible medical expenses are normally shared within fourteen days. Shared amounts are either directly paid to the provider or reimbursed to the member. OneShare Health acts as the facilitator, bringing together first-class processes and providers for the sake of our members. We want to provide a superior member experience.

More than a Health Sharing Program

OneShare Health is a health care sharing ministry whose number one service will always be to our members. By sharing their monthly contributions, OneShare Health members help one another gain access to the hospitals, providers and services they need. We constantly seek the best healthcare options including dental, hearing, vision, durable medical equipment, and physical therapy for our members.

OneShare Health is also a 501(c)(3) public charity. We want to lead by example by sharing with other charities around the world. A portion of our unrestricted net assets are shared with other charities who demonstrate a financial need or worthy purpose. For example, OneShare Health contributes to the Montego Bay Autism Center in Jamaica, where certified teachers work with special needs children and their parents who have limited resources and income.
